General Information:Crop Spacing

Crop spacing varies based on many factors, including soil fertility and whether crops are planted in rows or in a square-foot style. In this general spacing guide for home gardens, the number of inches listed is distance each plant's stem should be from the stem of another plant.

| 18" Spacing | 12" Spacing | 6" Spacing | 1" - 2" Spacing | 1/4"-1/2" Spacing |
| :---: | :---: | :---: | :---: | :---: |
